

Name : Prakash Kapila

Father's Name: Partha Sarathi Kapila Mother: DurgaPrasuna

DOB: January 24 1973 Birth Place: Rajahmundry Education: MCA

Constituency: LB Nagar. Residency:

India	US
C 107 Hill Colony Vansathali Puram (LB Nagar Constituency) Hyderabad 500070 Time: 1982 to present	New Jersey 08863 2002- till present. California.FL -1998-2001

My philosophy:

Mountain high obstructions when interfaced with will power will result in molehill complexities.

My favorite quote:

Stop not till you achieve your goal. – vivekananda.

Summary:

I have been working in IT for 15 years. After my MCA 12 years I have in USA. Graduated from Osmania University on 1996. Worked in Sparsh till April 1998, Came to USA on April 1998. Went back to India on 2001 April and set up my own company called Innovative Softech Pvt ltd which did primarily training as a CMC franchise then later on turned into TCIL at 2008. Innovative Softech recently has diverged in s/w development also and operates ,owns www.gujbiz.com.

I worked in IT helping various functions of finance like insurance, Foreign exchange, Fixed Income, Compliance, Regulations, Wealth management, Derivatives (credit, debit, fixed income, Credit Default Swaps, MBS, equity) my last stint was to create a multi threaded engine for derivatives in citi.

My Work in PFL

I joined PFL in 2010 during visit of Shri JP to NJ. I am active volunteer in NJ events and have represented PFL in NATS, NATA, TIFAS, FPC and participated in various programs that will benefit India like Anna Hazare's Anti Corruption in NJ, NY, Participated in panel discussion along with Prashant Bhusan in TimesNow channel. I contested elections in NJ along with others and won the finance seat after a initial tie. I have enabled PFL to become closer to TV5 and was instrumental in induction of many PFLers as TV5 reporters in their respective cities.

My strengths :

When I started a company with idea that we can manage the company from abroad everybody gave me 6 months if I was lucky enough to even start, I have led the company in 2 severe recessions 2002 & 2008 where so many have fallen. My education has been modest (MCA), but my experience has been world class. I also have ability to read through the budgets and income statements of governments and companies and interpret them.

Reason I want to run:

For many years India has seen the same as before Independence, only people who are born to a well to do family, a political family, a powerful family are having chance to get power and create fiefdoms out of that power structure. Riots & Corruption are the results of such endeavors and India has lost so much in that process. Its time we regain what has been lost and I want to help that process by standing for

elections, It will be a example for others to also think that even though you dont come from a rich family or powerful family you can run and win.

I will create a society that will enrich Innovation, enrich the knowledge base, enrich the idea of “possible” in hearts and minds of people.I will campaign for a society where everybody will think of setting up their own business,where everybody will feel happy to be recognized by the contribution they make to society, where everybody will have equitable partnership in building the society.

My hobbies include blogging in various Newspapers, doing a TV5 show on events that affect India.
